EPA is committed to working closely with response agencies and state and local officials to ensure the safety of citizens, respond to concerns and to evaluate impact to water contaminated by the Gold King Mine Release. EPA is sharing information as quickly as possible with the public as experts work to evaluate any effects the spill may have on drinking water, public health, agriculture, fish and wildlife.

Please see our website for the latest information: <http://www2.epa.gov/region8/gold-king-mine-release-emergency-response>

Regular updates will be posted as they are available.

Subject: Lack of Information/ Working Hours?

Hi,
I just called Region 8 here in Denver to ask why there was no information available on EPA's site concerning the recent issues on the Animas River. It was 4:30 is pm, Denver time. Apparently no one available to answer a call at that time.

Why is there no information available on EPS's site concerning the Animas situation? Is it not important?

I'm just an old P.E., Environmental Engineer type (and tax payer) and I'm shocked that there is no information available. The anti-EPA types would tell me I shouldn't be surprised that no one can bother to answer the phone. Maybe they are right.....

So, why no information available? What hours do you folks typically work?

Paul M. Perasso, P.E.
